

# QB HomeBuilder Risk Assessment™

## Risk Solutions for Builders.

At Quality Built, we understand how important it is to have a risk management program that can effectively communicate corporate standards while remaining flexible enough to be customizable on a per project basis.

Quality Built partners with builders to integrate our risk assessment services with their standard operating procedures, their trade partners and their quality assurance program. Our industry-leading technology helps builders and developers focus attention on the highest risk systems and components in construction projects. Our QB systems are the only systems to provide project specific training materials for each trade to assure complete and total project integration, from the lowest to highest levels in projects. We also promote training and improvement down to the crews based upon the actual data collected.

Our QB Homebuilder Risk Assessment includes on-site audit capabilities to evaluate and rate various categories including the following:

- » Site Cleanliness, Safety and Security
- » Soils and Foundation
- » Framing, HVAC and Plumbing
- » Exterior Cladding and Roof
- » Water Intrusion Protocol
- » Fire-rated and Sound Control Assemblies
- » Interior Finishes
- » Thermal Conditions
